

Snow's All Around

Teach the song by rote

Students will travel to 4 different stations to learn each line

At each station, they will sing the line and draw the corresponding picture

(Draw a simple house while singing line 1)

(Draw the ground while singing line 2) etc.

When the students have learned the whole song, the final station is:

CREATING SNOWFLAKES!

Some students may need help, some may not. This is OK :)

Once the kids have created a few snowflakes, have them glue the snowflakes to their picture and put their name in it.

You can have them sing the whole song periodically while they cut their paper
